

**CLAIM LISTING**

The following listing of Claims will replace all prior versions and listing of claims in the application:

1. (currently amended) A method for creating a customized composition at an assembling web site, comprising the steps of:  
receiving a request for a single composition, the composition being a file to include references for accessing composed of a plurality of graphics, each graphic accessible from one of a plurality of different sources;  
obtaining, for each of the plurality of different sources, a the reference to the graphic accessible from that source; and  
creating the single composition that includes each reference and information for positioning each referenced graphic on a sequence of pages within a document generated by processing the composition.
2. (previously presented) The method as defined in claim 1, the obtaining step comprises obtaining a reference to a graphic accessible from a different web site.
3. (previously presented) The method as defined in claim 2, wherein at least one graphic is generated dynamically at the different web site, when the web site is accessed.
4. (Original) The method as defined in claim 1, wherein each of a plurality of the different sources are on different web sites from said assembling web site.
5. (Original) The method as defined in claim 1, wherein the obtaining step comprises accessing at least two different web sites and retrieving information therefrom.
6. (cancelled)
7. (cancelled)

8. (currently amended) The method as defined in claim 1, wherein the single composition designates a referenced graphic a position on one of the sequence of pages that is different relative to that of another referenced graphic.

9. (Original) The method as defined in claim 1, wherein at least one of the sources is a file.

10. (Previously Presented) The method as defined in claim 1, further comprising serving the composition to an imaging client.

11. (Previously Presented) The method as defined in claim 1, further comprising printing the composition.

12. (Previously Presented) The method as defined in claim 1, further comprising sending the composition by email to a designated web site.

13. (Cancelled).

14. (currently amended) A program product comprising computer readable code for causing a system to perform the following method steps to create a customized composition at an assembling web site:

receiving a request for a single composition, the composition being a file to include references for accessing ~~composed of~~ a plurality of graphics, each graphic accessible from one of a plurality of different sources;

obtaining, for each of the plurality of different sources, a the reference to the graphic accessible from that source; and

creating the single composition that includes each reference and information for positioning each referenced graphic on a sequence of pages ~~within a document~~ generated by processing the composition.

15. (currently amended) A system for creating a customized composition at an assembling web site, comprising:

a component for receiving a request for a single composition, the composition being a file to include references for accessing ~~composed of~~ a plurality of graphics, each graphic accessible from one of a plurality of different sources;

a component for obtaining, for each of the plurality of different sources, a the reference to the graphic accessible from that source; and

a component for creating the single composition that includes each reference and information for positioning each referenced graphic on a sequence of pages ~~within a document generated by processing the composition.~~

16. (Cancelled).

17. (Cancelled).

18. (cancelled)
